ПРАКТИЧЕСКАЯ РАБОТА

Постановка задачи:

- 1. Сгенерировать запросы CREATE TABLE по Практической работе № 6. Показать скриншотами;
- 2. Заполнить созданные таблицы с помощью запроса INSERT INTO;
- 3. Вывести на экран все таблицы SELECT * FROM Table1.

Выполнение практической работы

На Рисунке 1 представлена физическая модель данных кофейни из прошлой практической работы.

Рисунок 1 — Физическая схема данных

На Рисунках 2-5 представлена физическая модель данных кофейни. На Рисунке 6 - результат переноса в DBeaver.

Рисунок 2 — Создание таблиц. Часть 1
